

FOR YOUR SAFETY

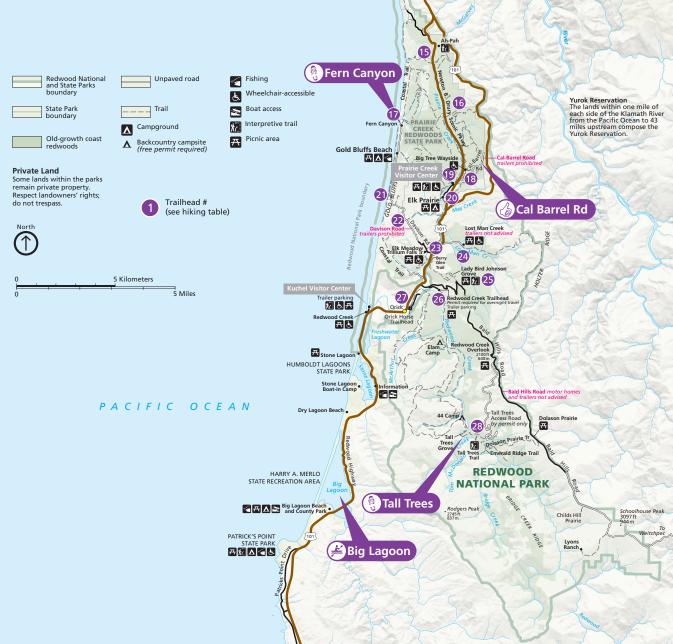

High Tide Check the tide tables before walking on the beaches. Rising water can trap you against a cliff with no possibility of escape.

Tsunami Hazard Zone

If you feel an earthquake, think "tsunami!" Go to high ground or inland and stay there.

Heavy Surf Very large, powerful "sneaker" waves can occur at any time. They will quickly pull you into the water and survival is unlikely. Never turn your back on the ocean.

Falling Limbs
Tree limbs can fall during high winds, especially in old-growth forests.

TRINIDAD STATE BEACH
