Approximately 750,000 of the 13+ million acres of land within the boundaries of Wrangell-St. Elias National Park and Preserve are non-federal lands belonging to Alaska Native Corporations, other private owners, and the State of Alaska. Significant amounts of these non-federal lands are located along the McCarthy and Nabesna roads and along the east bank of the Copper River. Please do not trespass. If you have questions, ask at visitor centers or ranger stations.
